

LI-10

Cloth package design

Butterfly-shaped light distribution lens

The sound absorbing panel is made of 100% polyester fiber material. It has sound absorption, flame retardant, non-toxic, non-irritating and misunderstanding. It is a new material that integrates sound absorption, heat insulation and decorative effects. The excellent optical system of the polarized light cup and the upper polarized lens, the excellent deep light control design can reduce the UGR of the lamp, reduce the damage of the glare to the eyes, and improve the working efficiency of the user.

Application places: office, conference room, study, library.

Customizable

Light Distribution:direct

Double sided lighting

CCT:3000K,4000K,6000K

CRI:82+,90+

Color:

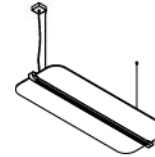

Application Case:
Office

Technical Data

Fi-10

Size: L1320*W500*H150MM

Input Power: 60W

Ra: Ra>80

Beam Angle: 70°

UGR: <18.0

Input Voltage: 220~240V

Frequency Range: 50/60Hz

Power Factor: 0.97

Working Temperature: -25℃ ~ +40℃

Dimmabledriver or NOT: Dimmabledriver

CCT: 3000/4000/6000K

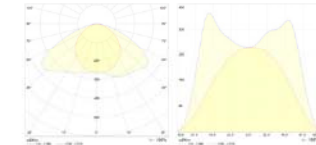

Lm/W: Up102/Down100

Luminous Flux: Up1411/Down2960

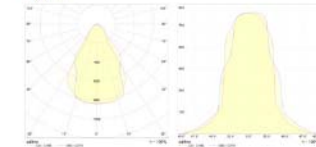

Insulation Class: CLASS I

IP Grade: IP 20
